Sandoval-Martinez	2014	6 MS	9780544669697			
	Notes: The connections between clusters and the extensive modeling are strengths for this textbook. There seems to be little conceptual development before moving into procedures. Opportunities for student reasoning come after direct instruction on procedures rather than before procedural instruction. This seems to violate the idea that procedural fluency flows from conceptual understanding.							
	Key Features: Houghton Mifflin Harcourt (HMH) GO Math! is a focused, middle school mathematics program designed to meet the objectives and intent of the Common Core State Standards for Mathematics. The GO Math! program was built from the ground up for the CCSS and provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today's educational technology. Over the past five years, HMH has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning. Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing. The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your districts through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho's middle school students.
